CAREER SUMMARY

Experienced detailed-driven, and committed software developer, with a get-it-done, on-time, and high-quality product spirit with a demonstrated history working in various fields of computer science. Skilled in Software Development, using technologies such as PHP/Laravel, JavaScript/Nodejs/ExpressJs/Reactjs MySQL, MongoDB, Digital Ocean, AWS, etc. Experienced with the latest cutting-edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive Agile team.

have used my expertise to develop software for companies with more than 6 years of experience defining requirements, designing, implementing, testing, and delivering complex software and Web applications

ACHIEVEMENT AND EXPERIENCE

Telvida Int'l Systems, Software Engineer

Feb 2022 - present

At Telvida International Systems Ltd, I joined the Action bet software unit. While working there I have worked on the following projects.

Actiobet API:

This API is responsible for fetching Sports events, odds, and virtual bet Data, and responsible for authenticating and authorizing users and restricting access to resources based on user roles and permissions.

IbejuIGR Enumeration App:

This web app helps the IbejuLekki local Government area generate Tax invoices for taxpayers, manage taxpayer information, and revenues, and also enables taxpayers to pay their local Government tax without leaving the comfort of their homes. <https://igr3.telvida.com>

Penciledge Nigeria Limited, Software Engineer

August 2021 - May 2022

I joined a team of developers to develop software solutions by studying information needs, conferring with users; studying systems flow, data usage, and work processes; investigating the problem areas; following the software development lifecycle. Here are the projects I worked on at Penciledge Nigeria Limited

WordPress Plugin:

I developed a WordPress plugin that extends the functionality of the woo-commerce plugin to support custom shipping services that implement SOAP API for data exchange.

BFAM e-learning platform:

This e-learning platform is for Christians who wish to extend their knowledge of the bible. I built this web app using Laravel and livewire for frontend interactivity.

21-Days challenge:

Through this platform, users can take on one or more challenges with each challenge having daily tasks that last for 21 days before being issued a certificate of completion. I built the app using NodeJs/ExpressJs and ReactJs.

Loveworld media:

This platform enables the writers of a devotional book called "Recreating your world" to distribute the book to users all over the world digitally in audio and document format along with different translations. I built this app using Laravel and livewire/AlpineJs.

SportsPadi:

This is a talent hunt platform for sports enthusiasts in Africa. Club managers can create a manager account on the platform and also players can have an account. We can call it LinkedIn for Sports enthusiasts. This platform facilitates the connection between sport club managers and sports talents within Africa.

Mozisha International, Fullstack Software Developer (Remote).

Oct 2020 - Sep 2021

I worked with a team as a PHP Laravel backend developer. I worked with the team to design and develop web services that were hosted on AWS.

Mozisha:

This is an apprenticeship-mentorship platform where prospective apprentices apply for apprenticeship openings and get hooked up with a mentor that offers to guide and mentor them in their desired area of discipline. This Web app was built with Laravel and livewire and hosted on AWS.

Freelance, Web Developer.

Oct 2016 - May 2020

Self-employed and hired to work for clients interested in my service. Here are the list of some of the projects I worked on.

Sandpiper

Sandpiper is a CRM and E-commerce platform built to manage sales pipeline and customer relations. This CRM supports multiple-company concurrently. It was built with laravel, Livewire, and alpine.

SavingBox

This is a simple digital money-saving platform for individuals who wish to keep a percentage of their income for the future. Transactions and payments were managed using flutterwave payment gateway. The app was built with Laravel, Livewire, and AlpineJs.

Techtiary Club, IT Trainer.

Sept 2019 - Dec 2019

I trained a number of students who were interested in software development but

did not know how to go about it. I took the time to guide the trainees from zero level to a Junior level where they can get to proceed in their careers without any physical connection with a trainer. I thought the students HTML5/CSS3 Javascript and PHP.

After completion of the training, a certificate of appreciation for a Job well done was issued to me by the founder of the club.

LEADERSHIP

❖ QUEEN AFRIQUE 2021 EDITION - TEAM LEAD

Feb 2021 – April 2021

I am the team lead for Queen Afrique 2021 team, my team worked on five different projects focusing of solving unique problems, I trained the participant on the fundamentals of software development and guide through the software development cycle and we implement Agile methodology for project management. the projects focused on solving the challenges users faced when there is a decision making problems on e-commerce platforms. The projects were developed using php and JavaScript.

❖ IT TRAINER | TECHTIARY CLUB

Sep 2019 – Dec 2019

TECHTIARY CLUB is a community of developers, designers, system engineers, and network engineers. Inventors consist of over 12 members of skillful tech guys and ladies. Techtiary club train individuals to be skillful and train them on ways to make money from their skills. Techtiary expose members to tech competitions and events. I am part of this great team and lead the campus community to a great height while on campus.

FRAMEWORKS AND LIBRARIES/YEARS

ReactJS(2), Laravel(5), JQuery(4), TailStack(4), LAMPStack(5), NodeJS/ExpressJS(3), AWS cloud(1), Docker(1), Agile.

OTHERS

Project Management, Git, Linux, Digital Ocean Cloud Platform, SLACK, Windows, CI/CD.

EDUCATION

B-TECH:

Ondo State University of Science and Technology (OSUSTECH) (Computer Science) 3.21/5.0 .

Diploma in web development and computer Engineering:

Tashico Computer Institute - Ijebu-Igbo, Ogun State.

OTHERS:

Gofamint Comprehensive high school,
Kiddies Focus Nur/Primary School.

LANGUAGES/YEAR(S) :

Experience: JavaScript (4), and PHP (6)

Professional Experience: JavaScript(3), and PHP(4).

DATABASES:

MYSQL(5), MongoDB(2), and FireBase(4).

Skills Summary:

- Work with other software leads on developing testing processes and frameworks
- Focus on innovating new and better ways to create solutions that add value and amaze the end-user, with a penchant for simple elegant design in every aspect from data structures to code to UI and systems architecture
- Worked with platform architects on software and system optimizations, helping to identify and remove potential performance bottlenecks
- The focus is on solving business problems via technology in a fast-changing environment: time to market is critical, but no compromise on quality or performance
- Design and develop microservice-based application which adheres to cloud development principle and documentation
- Collaborate with front-end and mobile app development teams on user-facing features and services
